ADP(R) Simplifies Life for Small Business Owners With Enhancements to the RUN Powered by ADP(R) HR and Payroll Solution

More Intuitive User Experience and Enhanced Employee Self-Service Options Ease the Administrative Demands of Running a Small Business

ROSELAND, NJ -- (Marketwired) -- 05/20/15 -- ADP$^{®}$ today announced [enhancements](#) to its popular [RUN Powered by ADP®](#) (RUN) platform that are designed to help small business owners save time on payroll and other human resource (HR) tasks and focus more on building their business.

More than 400,000 small businesses today rely on RUN, a cloud-based human resource management solution that provides simple payroll, tax filing and employee time-tracking services designed to be affordable and compliant. RUN also provides helpful HR management services like job description templates, job applicant screening, employee handbook development, and more.

"For time-starved small business owners, we know every minute saved makes a difference," said John Ayala, president of ADP's Small Business Services division. "We continually look for ways to enhance the RUN platform to ease the burden on small business owners, so they spend less time doing administrative work and more time focusing on growing their business."

The most recent enhancements to the RUN Powered by ADP platform include:

- **Redesigned user experience:** RUN's refreshed design includes intuitive icons displayed in an organized and easy-to-use layout, where the most-used functions are positioned front and center to increase efficiency for users.

- **Employee Access$^{®}$ enhancements**: Employees of RUN clients can now view and print pay statements and can modify their direct deposit information without the need to involve their employer.

- **Mobile apps:** RUN's new mobile experience takes convenience to an all new level with payroll reminders sent right to your Apple Watch^{TM}. In addition, the app was also recently enhanced to allow Apple$^{®}$ iPhone$^{®}$ users to process payroll and view HR information any time and from anywhere.

- **Payroll data entry error alerts:** RUN's new payroll data entry system identifies and alerts users to potential errors, helping them avoid common mistakes before they are submitted.

Today's announcement illustrates ADP's commitment to and investment in enriching the user experience for all of its clients, and reinforces ADP's focus on helping its clients build better workforces. The new RUN experience complements upgrades to ADP's midsized business solution announced earlier this week.
