ADP AdvancedMD Releases EHR Optimized for Multiple Browsers

Leading EHR Provider Responds to Private Practice Demand for Safari and Chrome

SOUTH JORDAN, UT -- (Marketwired) -- 07/16/15 -- [ADP® AdvancedMD®](#), a leader in all-in-one, [cloud electronic health record \(EHR\)](#), [practice management](#), [medical scheduling](#), and [medical billing services](#) today announced that its EHR platform is now optimized for Apple Safari and Google Chrome browsers, in addition to Internet Explorer 11. The pioneer of [big data reporting and business intelligence](#) for smaller medical practices has long supported Microsoft Internet Explorer, and today delivers increased speed and flexibility for medical practices by leveraging a wider variety of browser technologies.

The ADP AdvancedMD EHR is now more OS-agnostic, giving clients the freedom and flexibility to use nearly any device that runs on a modern Mac or Windows operating system. By leveraging modern browser technologies, the new ADP AdvancedMD EHR also delivers increased speed and simplicity over previous versions, which were accessible only by Internet Explorer.

"Over the past year we have seen more and more of our clients using mobile devices such as tablets to access patient charts, and there has been a growing interest in using the web browsers native to them," said Arman Samani, ADP AdvancedMD CTO. "ADP AdvancedMD EHR is now more OS-agnostic, and this provides our clients with the added benefit of increased performance on all browser platforms."

The ADP AdvancedMD multi-browser EHR increases speed by up to 30%, particularly for prescription and note writing. The company plans to continue support for the latest versions of Internet Explorer as well as the upcoming Microsoft Edge with Mozilla Firefox support scheduled for late summer 2015. Multi-browser optimization of ADP AdvancedMD practice management software is under development.

"We know we can rely on ADP AdvancedMD to continue to innovate and enhance technology to help us work in the most efficient and productive ways possible," said Robert Miller, MD, Pediatric Nephrologist at New Mexico Children's Kidney Center. "The multi-browser EHR is stable, fast, and easy-to-use on all three browsers, Mac OS and Windows 7. The speed is amazing and responsiveness has greatly improved."
