* Sum of components may not equal total, due to rounding.

| Franchise Employment**

- i Franchise jobs 26,000

**Complete details on franchise employment can be found [here](#).

Payrolls for businesses with 49 or fewer employees increased by 34,000 jobs in September, down from 68,000 in August. Employment at companies with 50-499 employees increased by 56,000 jobs, up from last month's 40,000. Employment at large companies -- those with 500 or more employees -- increased by 64,000, down from 67,000 in the prior month. Companies with 500-999 employees added 8,000 and companies with more than 1,000 employees added 56,000 in September.

Goods-producing employment was up by 3,000 jobs in September, following August losses of 9,000. The construction industry added 11,000 jobs, following August losses of 2,000 jobs. Meanwhile, manufacturing jobs were down 6,000 in September, after losing 4,000 in the previous month.

Service-providing employment rose by 151,000 jobs in September. The *ADP National Employment Report* indicates that

professional/business services contributed 45,000 jobs, down from 53,000 in August. Trade/transportation/utilities increased by 15,000 jobs in September, down from 26,000 jobs added the previous month. Financial activities added 11,000 jobs, down from last month's gain of 15,000 jobs.

"Job gains in September eased a bit when compared to the past 12-month average," said Ahu Yildirmaz, vice president and head of the ADP Research Institute. "We also observed softening this month in trade/transportation/utilities, possibly due to a continued tightening U.S. labor market and lackluster consumer spending."

Mark Zandi, chief economist of Moody's Analytics, said, "The current record of consecutive monthly job gains continued in September. With job openings at all-time highs and layoffs near all-time lows, the job market remains in full-swing. Job growth has moderated in recent months, but only because the economy is finally returning to full-employment."

The October 2016 *ADP National Employment Report* will be released at 8:15 a.m. ET on November 2, 2016.

About the ADP National Employment Report[®]

The *ADP National Employment Report*[®] is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP[®], a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute[®], a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report Development Methodology](#).
