ADP National Employment Report: Private Sector Employment Increased by 147,000 Jobs in October

ROSELAND, NJ -- (Marketwired) -- 11/02/16 -- Private sector employment increased by 147,000 jobs from September to October according to the October [ADP National Employment Report®](#). Broadly distributed to the public each month, free of charge, the *ADP National Employment Report* is produced by the ADP Research Institute® in collaboration with Moody's Analytics. The report, which is derived from ADP's actual payroll data, measures the change in total nonfarm private employment each month on a seasonally-adjusted basis.

The October *ADP National Employment Report* is the first installment of this monthly report that includes the 10 super sectors outlined by the U.S. Bureau of Labor Statistics.

"Job growth appears to be shifting from small to large companies due to the lessening impact the global economic environment had on large companies earlier in the year," said Ahu Yildirmaz, vice president and head of the ADP Research Institute. "This is also true because large companies often have the resources to attract workers with better pay and benefit packages."

Mark Zandi, chief economist of Moody's Analytics, said, "Job growth remains strong although the pace of growth appears to be slowing. Behind the slowdown is businesses' difficulty filling open positions. However, there is some weakness in construction, education and mining."

The November 2016 *ADP National Employment Report* will be released at 8:15 a.m. ET on November 30, 2016.

About the ADP National Employment Report[®]

The *ADP National Employment Report*[®] is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP[®], a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute[®], a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report Development Methodology](#).
