

U.S. Wage Growth Accelerated from 3.4 Percent to 3.8 Percent Annually; Majority of U.S. Workers Received Wage Increases While Employment Growth was Flat

New entrants saw strong wage growth in finance (8 percent) and professional services (5.4 percent)

ROSELAND, N.J., April 24, 2019 /PRNewswire/ -- Wages for U.S. workers grew 3.8 percent over the last year, increasing the average wage level by \$1.04 to \$28.40 an hour, according to the ADP Research Institute® [Workforce Vitality Report](#) (WVR) released today. The growth, accelerating from 3.4 percent to 3.8 percent annual as of March 2019, was driven by strong wage gains for workers in the manufacturing industry, representing 10 percent of the workforce (3.9 percent wage growth, \$29.55 average hourly wage) and trade, representing 22 percent of the workforce (4.9 percent wage growth, \$25.27 average hourly wage). The West (4.2 percent, \$30.50) and large businesses (4.9 percent, \$29.51) also contributed.

"As employment growth slows and wages accelerate for both job holders and job switchers, all signs point to a scarcity of skilled talent in the labor market," said Ahu Yildirmaz, co-head of the ADP Research Institute. "This trend is further evidenced by the significant wage growth we've seen for new entrants in most industries, which is great news for college graduates poised to enter the workforce this spring."

Job switchers in the information industry continued to lead the way for both wage level and wage growth with a wage level of \$44.45 and growth of 11.3 percent. Job switchers in professional and business services and construction also realized high wage growth of 8.5 and 8.6 percent, respectively. In trade, the largest sector, job holders experienced stronger growth in wages than the workers who switched to the industry, 5.1 percent versus 3.9 percent but lagged in employment growth with only a paltry 0.7 percent annually.
