- Franchise jobs 4,500

**Complete details on franchise employment can be found [here](#).

"Small business hiring picked up in the month of June," said Ahu Yildirmaz, vice president and co-head of the ADP Research Institute. "As the economy slowly continues to recover, we are seeing a significant rebound in

industries that once experienced the greatest job losses. In fact, 70 percent of the jobs added this month were in the leisure and hospitality, trade and construction industries."

The matched sample used to develop the *ADP National Employment Report* was derived from ADP payroll data, which represents 460,000 U.S. clients employing nearly 26 million workers in the U.S. The May total of jobs added was revised from -2,760,000 to 3,065,000.

To obtain additional information about the *ADP National Employment Report*, including additional charts, supporting data and the schedule of future release dates, or to subscribe to the monthly email alerts and RSS feeds, please visit www.adpemploymentreport.com.

The July 2020 *ADP National Employment Report* will be released at 8:15 a.m. ET on August 5, 2020.

About the *ADP National Employment Report*®

The *ADP National Employment Report*® is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
