- Franchise Employment**

- Franchise jobs 52,300

**Complete details on franchise employment can be found [here](#).

"Our data, which represents all workers on a company's payroll, has highlighted a downshift in the labor market

recovery. We have seen a decline in new hires, following significant job growth from the first half of the year," said Nela Richardson, chief economist, ADP. "Despite the slowdown, job gains are approaching 4 million this year, yet still 7 million jobs short of pre-COVID-19 levels. Service providers continue to lead growth, although the Delta variant creates uncertainty for this sector. Job gains across company sizes grew in lockstep, with small businesses trailing a bit more than usual."

Mark Zandi, chief economist of Moody's Analytics, said, "The Delta variant of COVID-19 appears to have dented the job market recovery. Job growth remains strong, but well off the pace of recent months. Job growth remains inextricably tied to the path of the pandemic."

The matched sample used to develop the *ADP National Employment Report* was derived from ADP payroll data, which represents 460,000 U.S. clients employing nearly 26 million workers in the U.S. The July total of jobs added was revised from 330,000 to 326,000.

To obtain additional information about the *ADP National Employment Report*, including additional charts, supporting data and the schedule of future release dates, or to subscribe to the monthly email alerts and RSS feeds, please visit www.adpemploymentreport.com.

The September 2021 *ADP National Employment Report* will be released at 8:15 a.m. ET on October 6, 2021.

About the ADP® National Employment Report™ The *ADP® National Employment Report™* is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
