- Franchise Employment**

- Franchise jobs 35,300

**Complete details on franchise employment can be found [here](#).

"The labor market recovery continued to power through its challenges last month," said Nela Richardson, chief economist, ADP. "November's job gains bring the three month average to 543,000 monthly jobs added, a modest uptick from the job pace earlier this year. Job gains have eclipsed 15 million since the recovery began, though 5 million jobs short of pre-pandemic levels. Service providers, which are more vulnerable to the pandemic, have dominated job gains this year. It's too early to tell if the Omicron variant could potentially slow the jobs recovery in coming months."

The matched sample used to develop the *ADP National Employment Report* was derived from ADP payroll data, which represents 460,000 U.S. clients employing nearly 26 million workers in the U.S. The October total of jobs added was revised from 571,000 to 570,000.

To obtain additional information about the *ADP National Employment Report*, including additional charts, supporting data and the schedule of future release dates, or to subscribe to the monthly email alerts and RSS feeds, please visit www.adpemploymentreport.com.

The December 2021 *ADP National Employment Report* will be released at 8:15 a.m. ET on January 5, 2022.

About the ADP® National Employment Report™

The *ADP® National Employment Report™* is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
